FORGED PISTON for RB26DETT

2 more size options are now available!

TOMEI's answer to cover those market demands both for the rebuild needs with 86.2mm bore, as well as competition needs by 87.5mm bore.

Ellipse and barrel-shaped design basing on precise analysis to achieve the best piston profile at metal-expanded condition under operating temperature range.

This design of TOMEI original helps to keep the best alignment against the piston cylinders that reduces friction loss, blow-by gas, as well as unwanted mechanical noise.

RELATED PRODUCT

NISSAN RB28 KIT

Super quick response from the optimized weight balance and wide range of torque output from the extra displacement.

The RB28 kit is now available with the new 86.2 / 87.5mm pistons.

[With Conrod Bearings Bundle Pack]

Tomei has made an option to include their Competition Bearing Series product with our kits. All the engine internals are brought to static temperature (20 degrees Celsius) and blueprinted with 0.040-0.060mm clearance bearings. This eliminates the measuring and blueprinting process for the customer, so the kit can be installed with less hassle.
